

## **DURABLE EUCALYPTS ON DRYLANDS: PROTECTING AND ENHANCING VALUE**

Workshop

19<sup>th</sup> - 20<sup>th</sup> April 2017

**Marlborough Research Centre, Blenheim**

**Advance notice:** industry partners, scientists and growers

We are planning a workshop to update all those interested in the exciting and fast-moving developments in durable eucalypt research.

### **Wednesday 19<sup>th</sup> April:**

A full-day indoor programme, with presentations by New Zealand and international research scientists and technical specialists. Topics will include:

- Siting and microclimates
- Eucalypt defoliation by insects: impacts and monitoring
- The NZDFI breeding plan
- Early selection for low growth-strain
- Propagation
- Early heartwood & extractives
- Heartwood and durability
- Down-stream opportunities: LVL requirements and markets.

### **Thursday 20<sup>th</sup> April:**

We plan a visit to see some of our research in action in the field, followed by a tour of LVL producer Nelson Pine International, which is trialling durable eucalypts for its laminated products.

Mark these dates in your diary!

**April 19<sup>th</sup>-20<sup>th</sup> 2017**
