

Durable Eucalypts on Drylands: Workshop/Research Update

UNIVERSITY OF CANTERBURY SCHOOL OF FORESTRY - ROOM: F1 LECTORIAL

Join us at this free workshop when we will review the outcomes of MPI SFF project
'Minimising growth-strain in eucalypts to transform processing'

– due for completion in June 2018. The day will also include an update on research outcomes from aligned NZDFI durable eucalypt programmes including: heartwood formation, species growth and yield on different sites, tree health, and economics.

9.30	Arrival, morning tea	
9.55	Welcome	Bruce Manley (School of Forestry)
10.00	The strategy for establishing a durable eucalyptus industry	Paul Millen (NZDFI)
10.20	Eucalyptus trees with abundant heartwood of good quality	Clemens Altaner / Yanjie Li (School of Forestry)
10.40	Growth models for durable eucalypts	Serajis Salekin / Justin Morgenroth (School of Forestry)
11.00	Managing insect pests in durable eucalypt plantations	Tara Murray (School of Forestry)
11.20	NZDFI Breeding programme	Luis Apiolaza (School of Forestry) / Ruth McConnochie (NZDFI)
11.40	Measuring sapwood depth on standing trees	Bill Heffernan / Nurzhan Nursultanov (EPEC Centre)
11.50	Wireless TreeTap	Michael Hayes / Michael Frampton (Electrical Engineering)
12.00	Lunch	
13.00	The Japanese export market for durable eucalypts: technical specifications	Tomo Kakitani (Sumitomo)
13.40	Laminated veneer lumber (LVL) from <i>E. globoidea</i>	Fei Guo (School of Forestry)
14.00	Making durable eucalypts fit for processing – early selection for low growth-strain	Nick Davies / Clemens Altaner (School of Forestry)
14.20	Propagation of improved durable eucalypts	Paul Schroeder (Proseed)
14.40	Tea break	
14.55	Feedback / Future work	Clemens Altaner / Paul Millen
15.30	Close	

Durable Eucalypts on Drylands: Workshop/Research Update
